

What happens when you combine Ramadan
with math?

You get...

RaMATHHan

The adhan for Maghrib comes in at 6:05 pm. If Muhammad looks at the clock at 5:45 pm. How long does he have to wait to break his fast?

If he looks at the clock at 5:00 pm, how long does he have to wait?

If he looks at the clock at 5:37, how long does he have to wait?

Ahmed read 32 ayaat after fajr. He read 16 after Tuhr and another 20 after asr. How many ayaat did he read in all?

There are nine people fasting in the Iqbal family. There are 18 samosas. How many samosas does each person get to break their fast?

There are 14 brothers in the masjid before Maghrib. One brother bought a container of 45 dates. How many dates will each brother get to break his fast? Are there any dates left?
